

# ***Enabling Concentrating Solar Power in India***

**Keith Lovegrove, Head – Solar Thermal, IT Power**

[www.itpau.com.au](http://www.itpau.com.au)

# Concentrating Solar Thermal Power is:

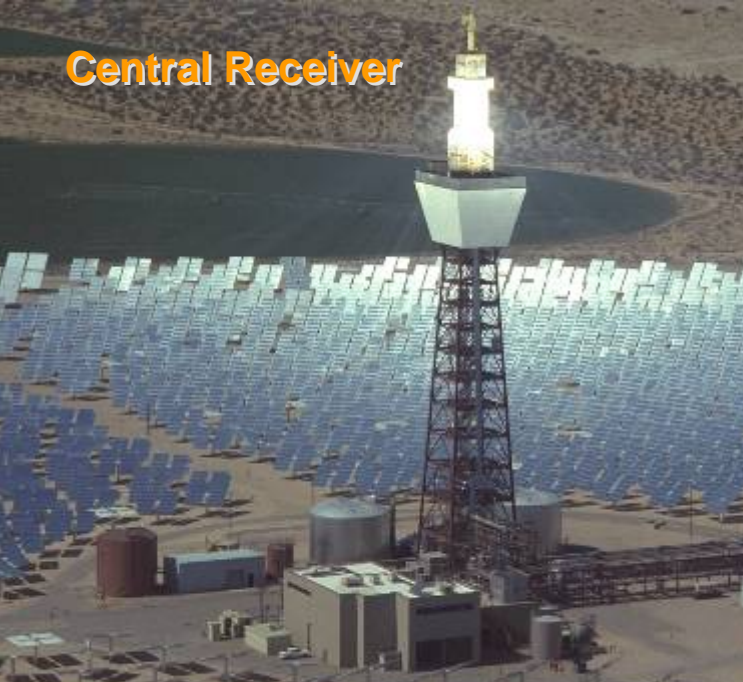

Parabolic Trough

Paraboloidal Dish

Central Receiver

Linear Fresnel

## Enabling the deployment of Concentrating Solar Power in India

- ★ An Ausaid “Public Sector Linkages Project” conducted by Aust Department of Climate Change and Energy Efficiency
- ★ Outcomes:
  - ★ CSP in India report (to assist Indian policy makers and tech experts)
  - ★ Technical exchanges at RE conferences
  - ★ Workshops
- ★ Associated benefits
  - ★ Links and exchange of knowledge
  - ★ Closer cooperation between MNRE (India) and DEWHA/DCCEE/ DRET etc (Aus)
  - ★ Establish networks of stakeholders
  - ★ Cross pollination of policy ideas

IT Power is the subcontractor for the CSP in India report (Keith Lovegrove, Joe Wyder). Key contact at DCCEE is Helen Hawke

## About IT Power

- ★ Leading international Renewable Energy and Climate Change consultants
- ★ Its roots trace back to the 1960s; Incorporated in 1981 as an independent entity
- ★ Headquartered in UK with offices across the globe
  - ★ Offices in UK, India, China, Australia, Africa, Latin America and the Pacific
  - ★ Strong teams in India and Australia
  - ★ Major shareholder is Indian based
- ★ Team with wide ranging experience across regions
- ★ Clients include Corporates, Banks, PE Funds and Governments in over 100 countries

# Keith's other hat: leading the Australian National University group that designed and built the Generation II Big Dish

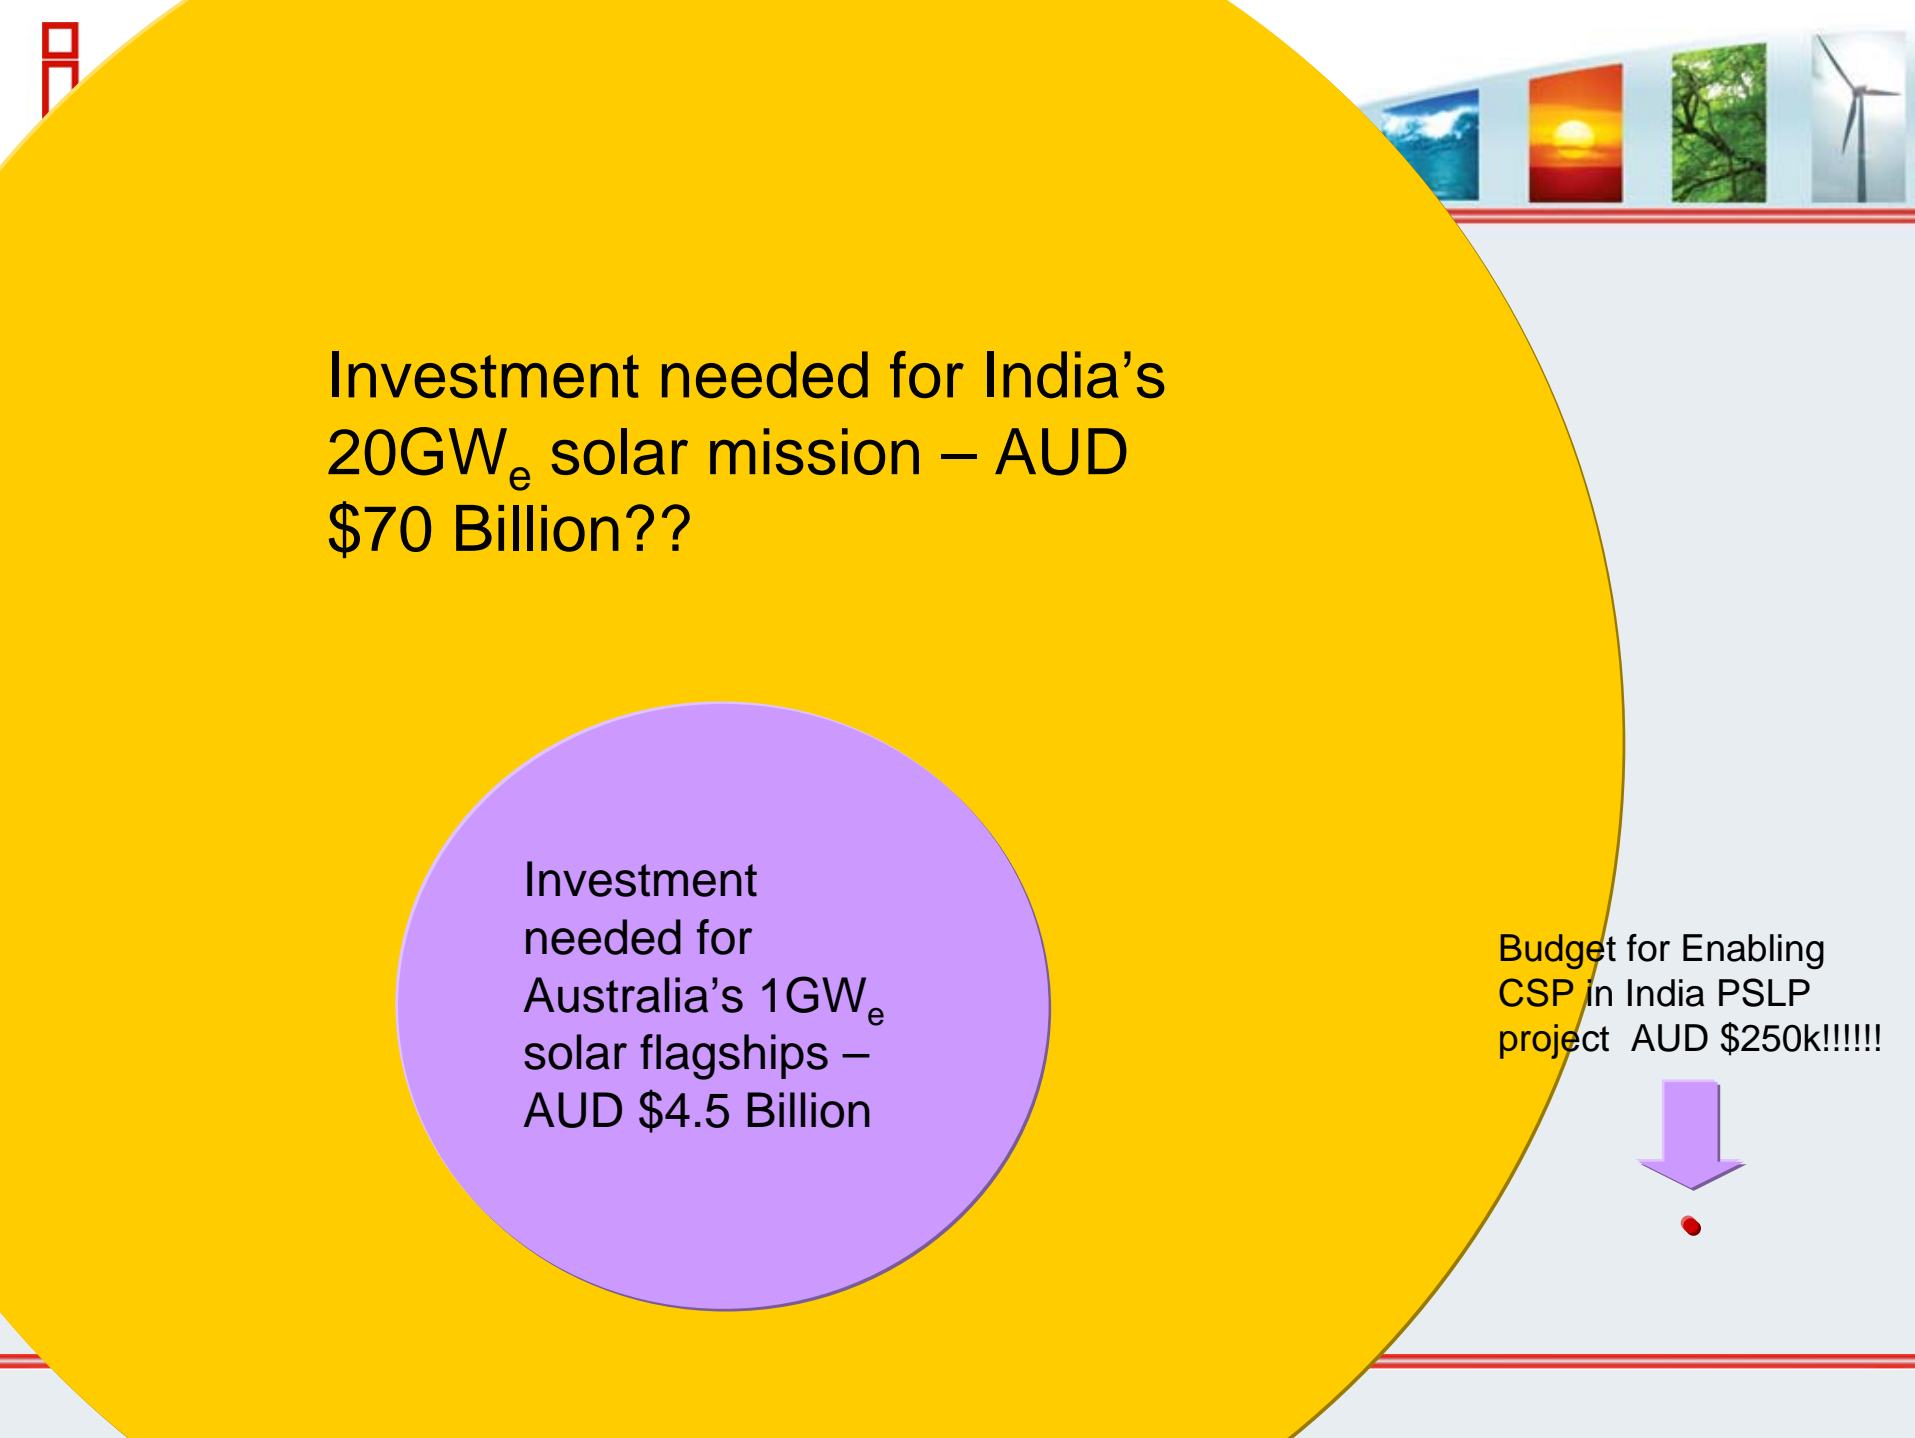

- ★ <http://engnet.anu.edu.au/Dereasearch/solarthermal/>
- ★ Supported by REDI (AusIndustry)
- ★ Worlds largest solar dish
- ★ Engineered for mass production
- ★ Aperture  $494\text{m}^2$  , focal length 13.4m
- ★ Now offered commercially by Wizard Power

# India and Australia compared

	India	Australia
Population	1100 million	20 million
Electricity Installed cap.	160GW	49GW
Land area	3.29 million sq km	7.7 million sq km
Primary energy	27,000 PJ/a	5,500 PJ/a
Net energy flow	importer	exporter
Policy drivers for Solar	Solar mission:	Solar Flagships:
	1,000MW <sub>e</sub> by 2013	1,000MW <sub>e</sub> by 2015
	20,000MW <sub>e</sub> by 2022	(20% renewable by 2020)

Investment needed for India's  
20GW<sub>e</sub> solar mission – AUD  
\$70 Billion??

Investment  
needed for  
Australia's 1GW<sub>e</sub>  
solar flagships –  
AUD \$4.5 Billion

Budget for Enabling  
CSP in India PSLP  
project AUD \$250k!!!!!!

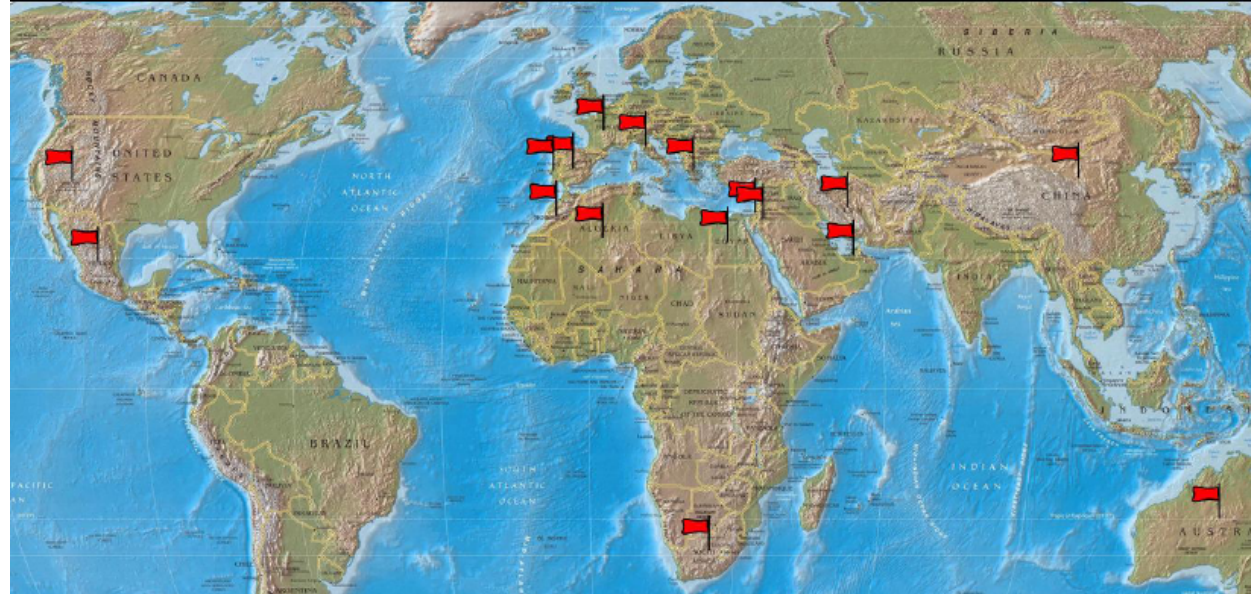

**Small ball bearings  
help big wheels turn!**

Countries Developing Concentrating Solar Thermal Power as of June 2008

- \* 20 year track record with Californian SEGS plants
- \* New wave from Spanish FIT and USA RPOs
- \* Approx. 1000MWe currently in operation
- \* Greenpeace / SolarPACES reports 23GW planned
- \* IEA: Looking for 20GW/yr CSP installation,
- \* Lots of troughs in Spain, US is generating more innovative approaches
- \* Beginnings of construction in Nth Africa

# Trough systems

Solargenix

EuroTrough

SenerTrough

AlbiasaTrough

- ★ Least technical risk, used in most current construction
- ★ All copies of the Californian SEGS plants
- ★ Approx 6 companies offering large trough systems, all 5m apertures.
- ★ 2 (3) market providers of evacuated tube receivers, 2 (3) providers of the glass facets

Pics from Zarza,  
SolarPACES 09

## Tower systems

- \* Several serious players building large scale prototypes
- \* More innovation than troughs
- \* Higher temperatures = higher efficiency

**eSolar**<sup>TM</sup>

**BrightSource**

**SENER**  
Torresol

**ABENGOA**

 **SOLARRESERVE**

# Linear Fresnel

- \* **Ausra;**
  - \* Australian origin, ex Solar Heat and Power,
  - \* moved to California, recently bought by the French Nuclear company Areva
  - \* Ausra's 5MW<sub>e</sub> system California, 23 Oct 2008, 100MW<sub>e</sub> system for Jordan announced
- \* **Novatec Biosol (Transfield) and Solar Power Group each have 1MWe demonstrations in operation**
- \* **Novatec**
  - \* German origins, bought by Transfield (Australia)
  - \* have just announced ground breaking on a 40MWe plant in Spain

# Dish systems?

Least commercially mature of the 4 approaches

- ★ R&D around Eurodish units
- ★ Stirling Energy Systems (SES) have big systems of Dish Stirling proposed but...?
- ★ Infinia a new player with 3kW dish Stirling
- ★ Solar Systems dish PV in Australia – now owned by Silex
- ★ ANU dish offered commercially by Wizard Power

### Venue: Solar Energy Centre, Gwalpahari, Gurgaon

<b>Welcome and introduction</b>	Dr. B. Bandyopadhyay, Advisor, MNRE & Head, SEC
<b>Session 1: Renewable Energy Policy Overview</b>	
<ul style="list-style-type: none"> <li>• Australia: Update on Renewable Energy policies</li> <li>• Indian Renewable energy policies</li> <li>• Questions and discussion</li> </ul>	Denis Smedley, Counsellor Designate, Aust. High Commission Dr. Ashvini Kumar, Director, MNRE
<b>Session 2: Renewable Energy Technologies</b>	<b>Speaker</b>
<ul style="list-style-type: none"> <li>• Australia               <ul style="list-style-type: none"> <li>- Concentrating Solar Power</li> <li>- Solar Thermal Tower</li> <li>- Solar Thermal Dish</li> <li>- PV</li> </ul> </li> <li>• Questions and discussion</li> </ul>	Steve McEvoy (CSIRO) Dr Keith Lovegrove (ANU) Prof. Andrew Blakers (ANU)
<b>Session 2: Renewable Energy Technologies continued</b>	
<ul style="list-style-type: none"> <li>• India               <ul style="list-style-type: none"> <li>- Concentrating Solar Power</li> <li>- Indian Perspective</li> <li>- Solar Thermal Tower</li> <li>- Decentralized Solar Thermal Power</li> <li>- PV</li> </ul> </li> </ul>	Mr. Shirish Garud, TERI M/s ACME Telepower, Gurgaon M/s. Thermax, Pune Mr. Deepak Kelkar, Square Engg, Pune
<b>Session 3: CSP Round table</b>	<b>Chair</b>

## Field Development - Helicostats and Control System

- Initial Field Helicostats were under-performing
- Control System was unreliable / under-engineered

Mr. Siddharth Malik  
Managing Director

Megawatt Solutions Pvt. Ltd.  
505 DLF Saket  
New Delhi 17

M: +91 965445 1401  
E: [smalik@megawattsolutions.in](mailto:smalik@megawattsolutions.in)

# India's SWOT analysis

## • Strengths

- Solar resource
- Industrial infrastructure
- Government commitment
- Huge market potential
- Strong engineering knowledge

## • Weakness

- Dependence on few technology providers Lack of experience
- Lack of serious R & D program and long term R & D goals
- Lack of long term consistent policy and
- Limited infrastructure at possible sites

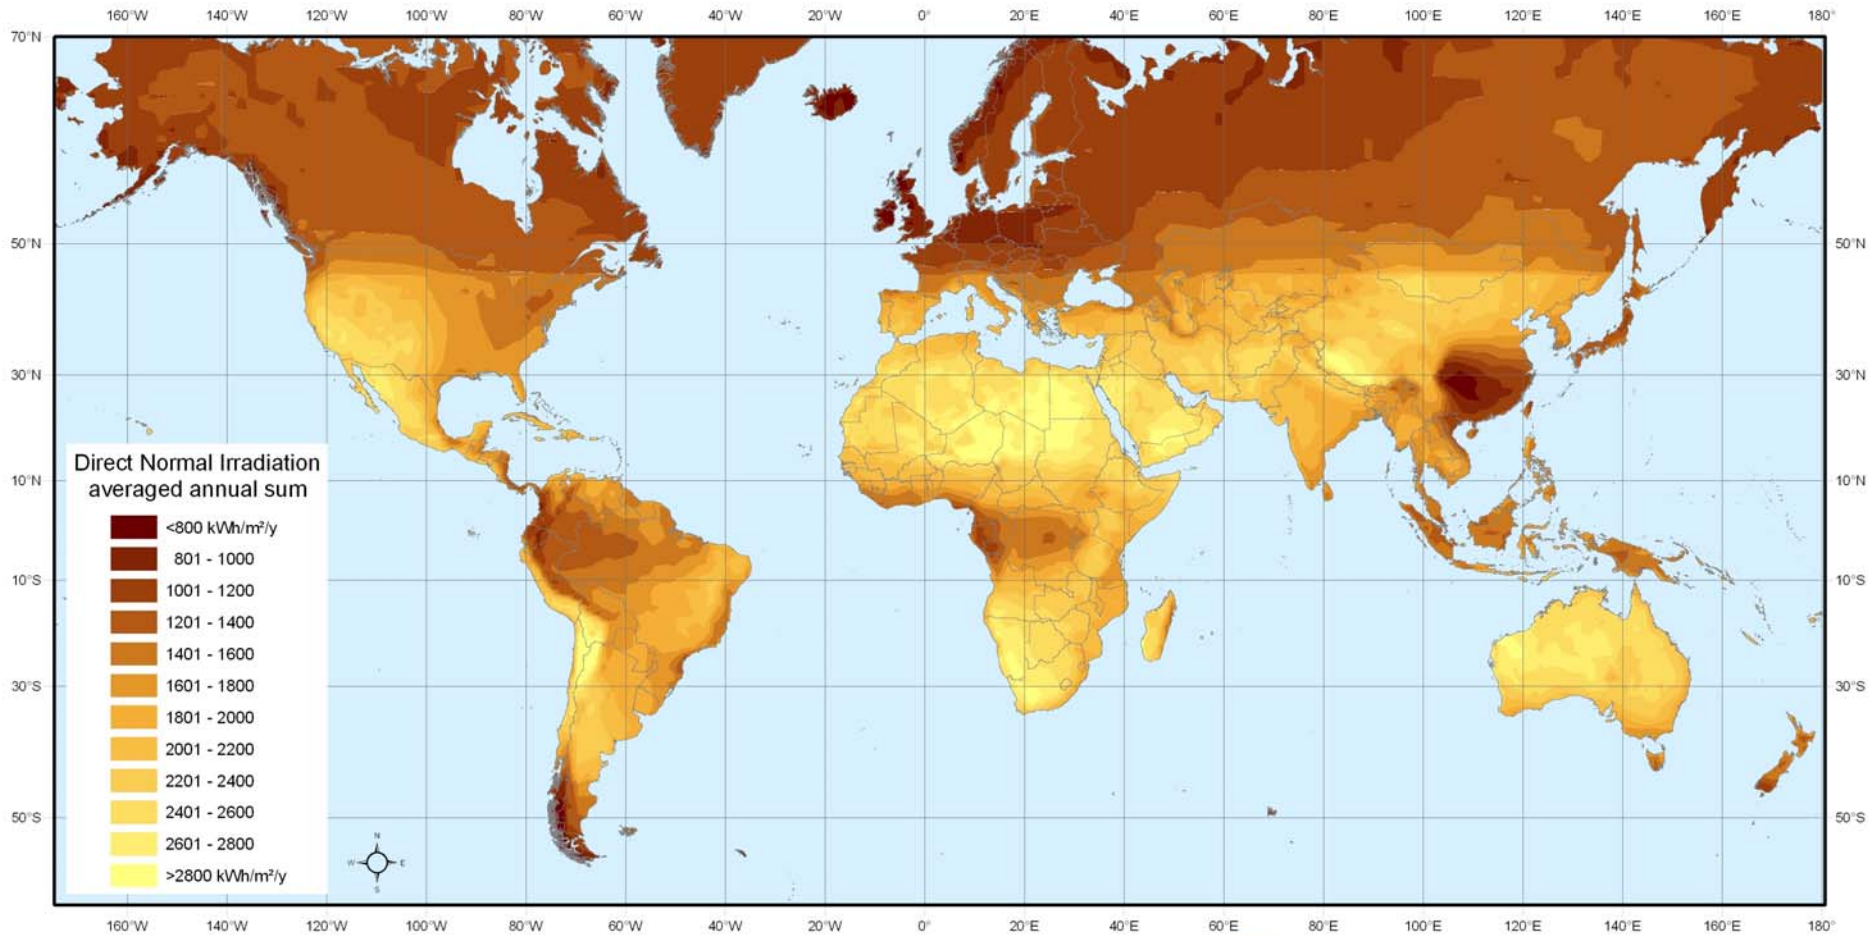

# CSP In India Report

- \* India's solar resources.
- \* Barriers to the deployment of CSP technologies.
- \* Overcoming the barriers.
- \* Existing enablers for CSP deployment.
- \* Developing expertise, research exchanges and secondments.
- \* Recommended options for two CSP pilot plants.

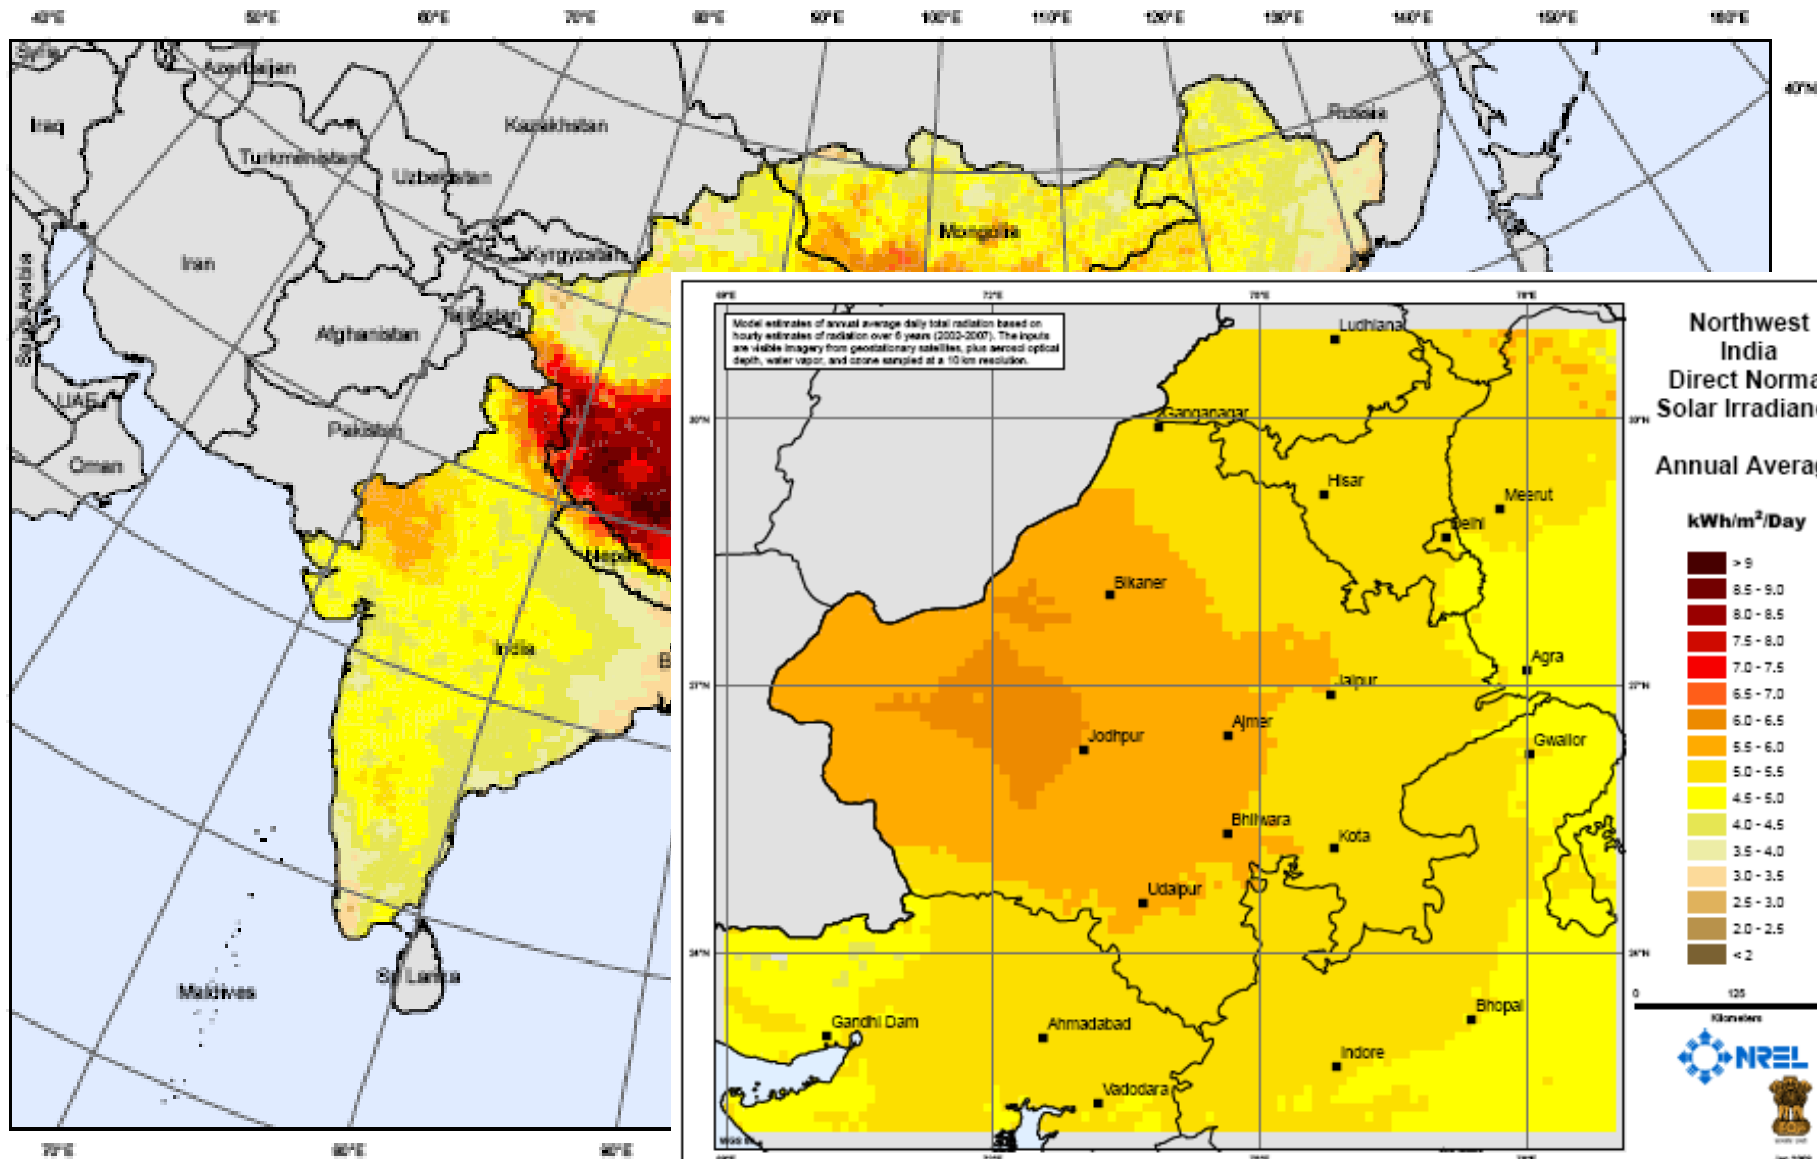

# Direct Normal Irradiation (DNI)

Data based on  SSE 6.0 dataset for a 22-year period (July 1983 - June 2005)  
(<http://eosweb.larc.nasa.gov/sse/>)

Map created and map layout by  2008  
(<http://www.dlr.de>)

# Selected Asian Countries - Direct Normal Solar Radiation

kWh/m <sup>2</sup> /day			
> 9	7.0 - 7.5	5.0 - 5.5	3.0 - 3.5
8.5 - 9.0	6.5 - 7.0	4.5 - 5.0	2.5 - 3.0
8.0 - 8.5	6.0 - 6.5	4.0 - 4.5	2.0 - 2.5
7.5 - 8.0	5.5 - 6.0	3.5 - 4.0	< 2

Model estimates of monthly average daily total radiation using inputs derived from satellite and surface observations of cloud cover, aerosol optical depth, precipitable water vapor, albedo, atmospheric pressure and ozone sampled at a 40km resolution.

## IT Power team working on the CST in India report..

- \* Working from Indian (Delhi) and Australian (Canberra) offices

Canberra
